

Simplified 3D Viewer

Abstract

A foldable viewer having a collapsed state and an erected state.

The viewer includes a collapsible and erectable viewing chamber, a viewing panel having a pair of lenses, an aperture panel having a pair of apertures, and a septum set into the aperture panel. The viewing chamber comprises front, rear, top and bottom planar walls which are contiguously joined, left and right walls joined to the front and rear walls but not joined to the top and bottom walls, and toggle tabs joined to the left and right edges of the top and bottom panels.
